SOFTWARE ENGINEER

Software Engineer building scalable, high-performance applications with a strong focus on user experience, interaction quality, and visual clarity.

EXPERIENCE

Techies Africa - Frontend Developer Aug 2025 - Nov 2025

- Developed and optimized internal dashboards using React, Next.js, TypeScript, and shadcn/UI.
- Built protected, role-based pages with dynamic tables, filters, and forms.
- Integrated frontend modules with backend APIs using TanStack Query, handling validation, permissions, and data workflows.
- Improved UI consistency and performance by refactoring reusable components and resolving critical bugs.

NAS Satellite - Software Developer Apr 2024 - May 2025

- Built and maintained optimized web applications serving clients across multiple industries.
- Integrated RESTful APIs and refactored legacy components to improve performance and maintainability.
- Debugged complex frontend issues and enhanced application stability.
- Delivered responsive, accessible interfaces aligned with business and user needs.

Frontend Developer - Independent Projects & Client Work 2022 - present

- Designed and developed responsive, high-performance web applications using React and Next.js.
- Built reusable UI components and implemented efficient state management strategies.
- Collaborated with clients to translate business requirements into intuitive user interfaces.
- Optimized applications for speed, accessibility, and cross-browser compatibility.

SELECTED PROJECTS

judithyusuf.vercel.app

Fully responsive portfolio showcasing projects, skills, and experience. Dynamic animations, reusable components, and performance-focused UI/UX.

Smart Waste Management System

A smart-bin tracking system with dashboards for real-time location, fill-level monitoring, and collection schedule management, intuitive mobile interfaces for field operations.

SKILLS

Programming Languages

JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass, PHP

Libraries & Frameworks

React, Next.js, Redux Toolkit, TanStack Query, Axios, Node.js, React Native, Tailwind CSS, Framer Motion

Tools & Platform:

Git, GitHub, Netlify, Vercel, Wordpress

Quality & Performance:

Responsive design, accessibility (WCAG), performance optimization, cross-browser compatibility

EDUCATION

Bachelor of Engineering (B.Eng) in Computer Engineering

University of Ilorin | 2019-2025
